

The joint institute FuDan University Shanghai Cancer Center – Institut Mérieux laboratory (FDUSCC-IM) is conducting ambitious research projects in oncology in China. This joint laboratory was created to promote interactions with hospital physicians and place public health as well as medicine at the heart of research activities. A dedicated research laboratory is currently running at the FuDan University Shanghai Cancer Center to develop and identify new biomarkers for early diagnosis of colorectal, lung and breast cancers. An international cooperation program (Immunocan) has started on January 1st 2012 involving 4 European partners (French, German, Danish and Italian) and the FuDan University Shanghai Cancer Center thanks the FP7 INCOLAB from the European Commission.

POSITION

Employer: Transgene

Website: www.transgene.fr

Location: FuDan University Shanghai Cancer Center, Shanghai, China

Type: Medical Doctor / Pharmacist / Project manager

Job description:

We have an exciting opportunity for a talented and motivated Medical Doctor or Pharmacist to join the Immunocan Program at the FuDan University Shanghai Cancer Center. The ideal candidate will be part of an international team responsible for the investigation and understanding of immunological systems pertaining to colorectal and breast cancers.
